GEOPANEL®

www.geoplast.it

GEOPANEL®

GEOPANEL® is an easy and intuitive system of modular formworks in plastic, to build walls, foundations and pillars in concrete. In comparison with the traditional systems such as the wood panels or the steel ones, Geopanel is handier, more economic and quicker to be installed. Geopanel has a series of panels of variable measures which can be fastened together by means of nylon handles fast closed. Thanks to the possibility of making several combinations you can have different thickness of 20, 25, 30, 35, 40 cm. and external and internal corners by means of special elements.

GEOPANEL® ADVANTAGES

SPEED

GEOPANEL® weights 11 Kg. only and therefore it can be installed by one person. It is light and easy to assemble thanks to the handles which allow an excellent lockup of the formworks with only a 90° turn.

GEOPANEL® doesn't require any dismantling agents, not even any particular treatments before the casting or during the assembling.

INSTALLATION

Its external structure has a series of edges which make the crib and the plumb-lining of the system easier.

The panels have been previously drilled for the passage of the threaded bars and of the spacing bars which are usually on sale, being accessories used for the traditional steel panels.

REMOVAL

The concrete does not stick to the plastic, which allows an easy removal and a quick washing up, without using any particular detergent, but some water only.

STORAGE

GEOPANEL® can be completely dismantled and stored even in damp places.

MODULARITY

All the elements are usually 60 cm. high and have variable length of 25, 30, 40, 120 cm; thus they don't require any cut, not even any adjustment, as you will use and combine the elements necessary to your project only.

HANDLING ON SITE

The material can be easily dismantled and quickly moved on the job site, without using any crane thanks to the handling system fast released.

REUSAGE

GEOPANEL® is economic as it needs just little maintenance in comparison with the traditional systems and it can be re-used up to 100 times (if you wash and use it accordingly).

RESULT

The wall obtained with **GEOPANEL®** can be left exposed without any further intervention.

GEOPANEL® FOR FLOORS

GEOPANEL® FOR FLOORS

The **GEOPANEL®** system can be used even to make floors quickly, reducing considerably the labour force and time and the quantity of wood. The **GEOPANEL®** system allows to make floors of 40 cm. thick, fastening the panels together.

THE **GEOPANEL®** SYSTEM IS COMPOSED BY THE FOLLOWING ELEMENTS AND ACCESSORIES:

	ELEMENT 25XH60 cm MATERIAL: ABS WEIGHT: 2,65 kg	1	HANDLE MATERIAL: Nylon WEIGHT 0,10 kg	
	ELEMENT 30XH60 cm MATERIAL: ABS WEIGHT: 2,90 kg	2	SPACING BAR 15 . 20 . 25 . 30 . 35 . 40 MATERIAL: PE HD WEIGHT: 0,08 kg	
	ELEMENT 40XH60 cm MATERIAL: ABS WEIGHT: 3,68 kg	3	CAP for spacing bar MATERIAL: PE HD WEIGHT: 0,006 kg	
	INT. CORNER ELEMENT 30X10XH60 cm MATERIAL: ABS WEIGHT: 3,85 kg	4	THREADED BAR ø17 MATERIAL: Iron WEIGHT: 1,07 kg	
	EXT. CORNER ELEMENT 33(25 usable)XH60 cm MATERIAL: ABS WEIGHT: 3,05 kg	5	WASHER for threaded bar MATERIAL: Nylon WEIGHT: 0,35 kg	
	ELEMENT 120XH60 cm MATERIAL: ABS WEIGHT: 11 kg
